# Can you spot the difference between these GeoPDF's?

# Can you spot the difference between these GeoPDF's?

# Context

- Accidents, malicious insiders, and cyberattacks are increasingly compromising sensitive information
  - National security, intellectual property, personally identifiable information
- Most deployed security technologies are not sufficient
  - Independently securing storage, transport, roles, and monitoring
- Industry has been developing and deploying content security in *three interconnected dimensions*
  - Content management + Rights Management + Content Analytics

# Data Protection Challenges

*Existing methods of  
network and storage  
security are still  
failing*

**Accidents. Insiders.  
Attacks**

# Context – Three Interconnected Dimensions of Security

Developing and deploying content security in three interconnected dimensions

# Good: Content Security in **One** Dimension

- Strong Authentication – definitively identify users
- Metadata – classifications associated with content
- Role based access – who can access what content
- Audit logs – record of all user and admin events

Content Management

Once sensitive content leaves the repository to an authenticated user, it can be accidentally or maliciously forwarded to unauthorized recipients!

# Better: Content Security in **Two** Dimensions

- Strong Authentication – definitively identify users
- Metadata – classifications associated with content
- Role based access – who can access what content
- Audit logs – record of all user and admin events

Content Management

**Protection beyond repository – independent of any subsequent storage and transport**

Rights Management

- Persistent protection – enforces access at file layer
- Permissions – restrict save, print, clipboard, modify
- Revocation – expire and terminate access after publishing
- Audit logs – record of all valid and invalid access

# Enveloped Encryption vs. Content Centric Security

With traditional enveloped encryption, like device, S/MIME, PGP, or ZIP, the container is decrypted to produce the contents.

You can't protect where the decrypted contents subsequently go.

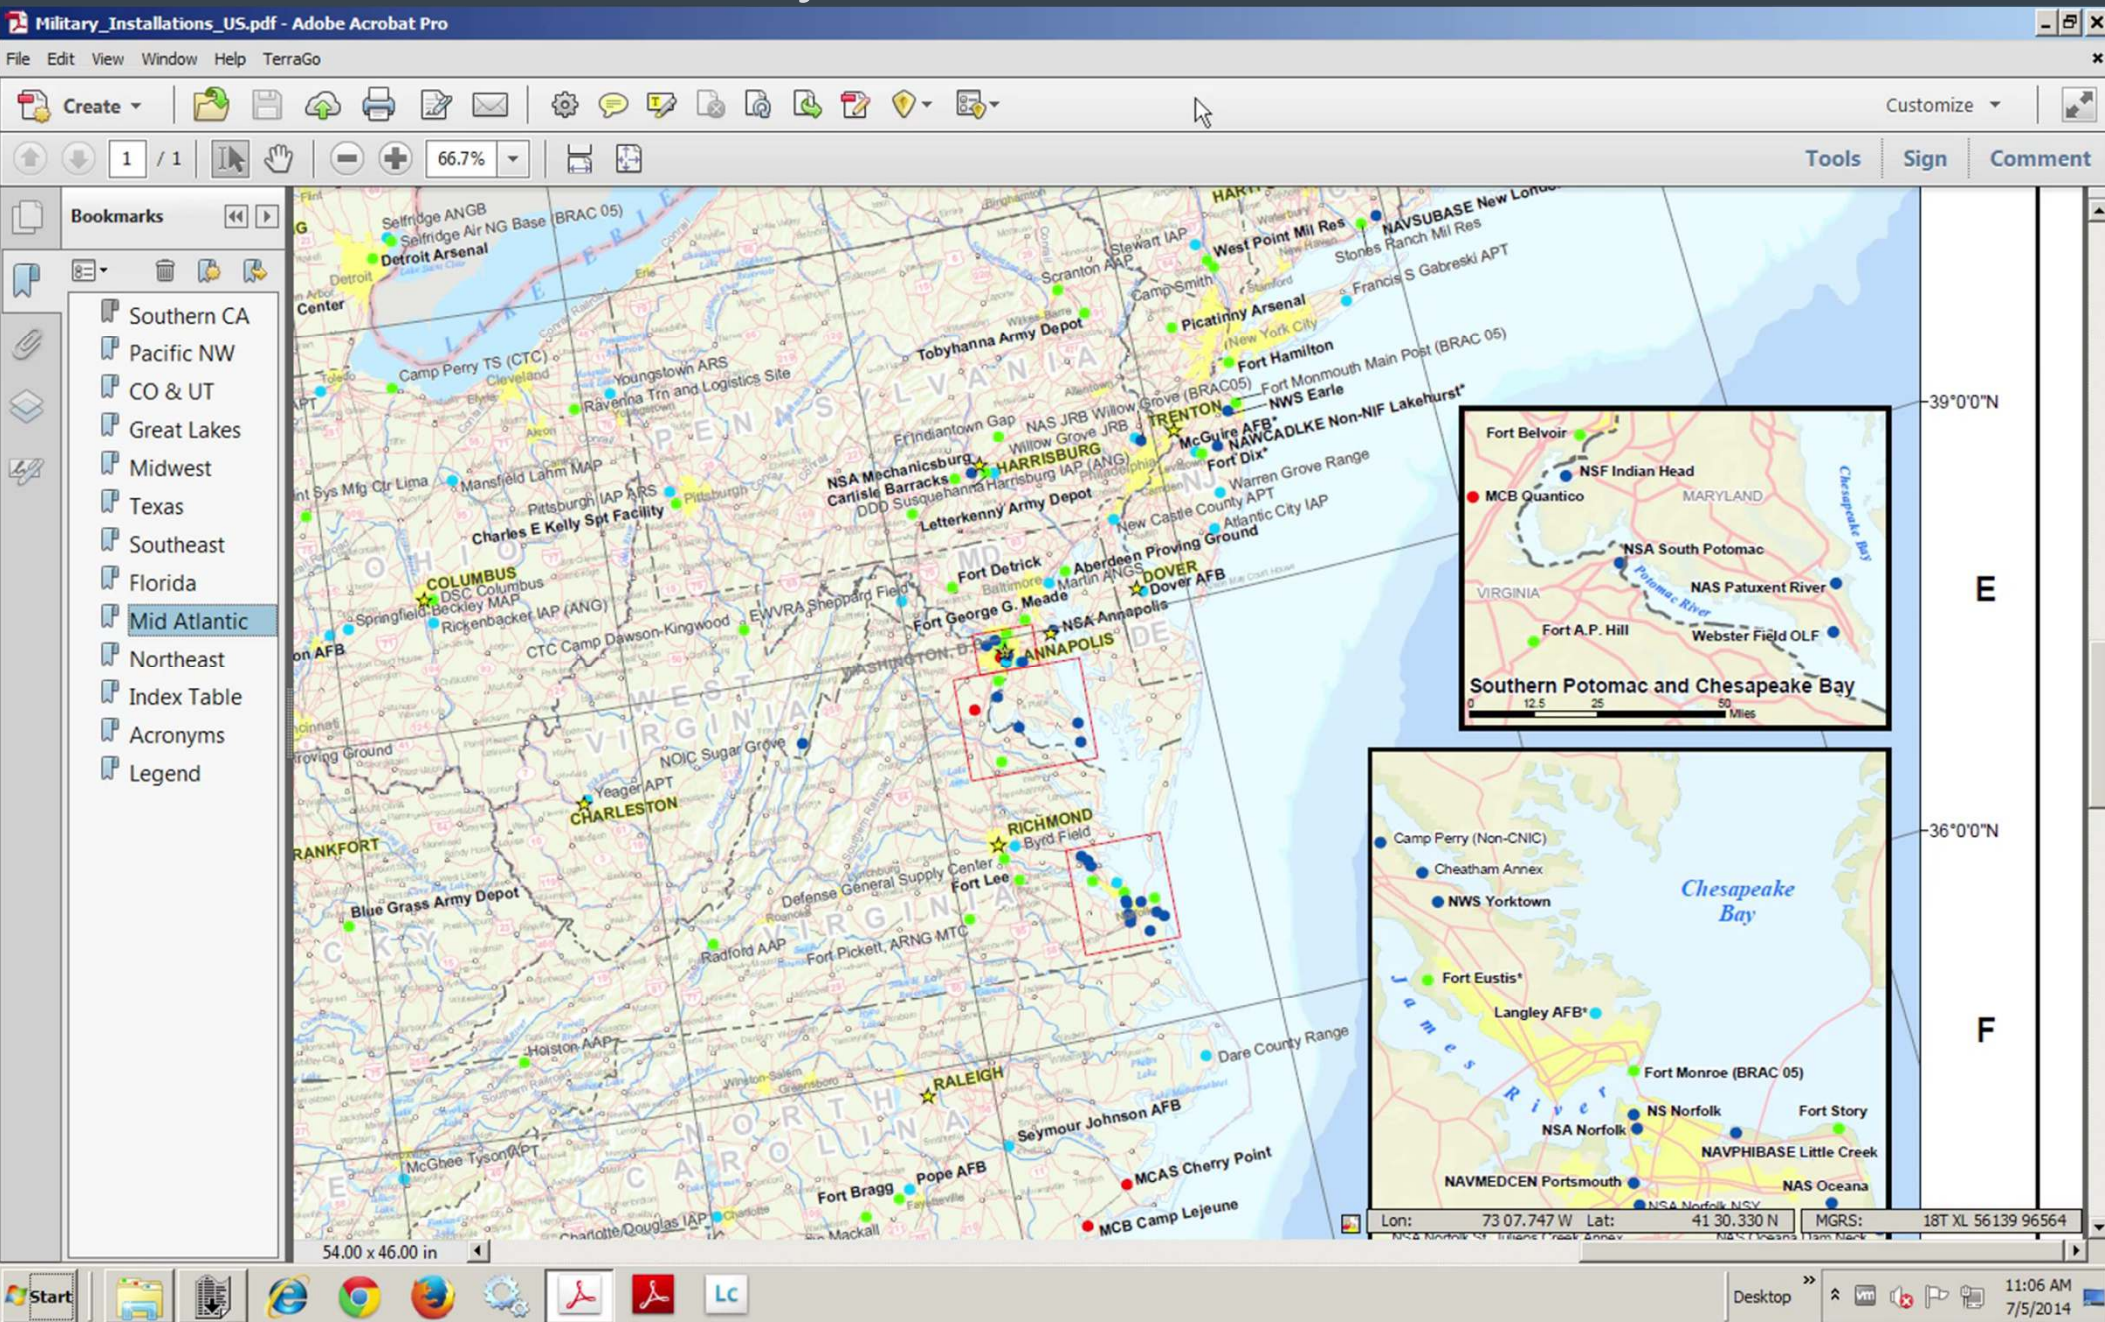

*With internal document cryptography, there are no unprotected copies. The encryption is inside the native file format itself.*

*Wherever the document goes, it stays protected & monitored.*

# Content Centric Security

# Best: Content Security in **Three** Dimensions

- Strong Authentication – definitively identify users
- Metadata – classifications associated with content
- Role based access – who can access what content
- Audit logs – record of all user and admin events

Content Management

Content Analytics

- Visualization – where documents are opened
- Anomalies – high download/open/print counts
- Affinity – associating users with content
- Realtime – immediately notify unusual activity

Rights Management

- Persistent protection – enforces access at file layer
- Permissions – restrict save, print, clipboard, modify
- Revocation – expire and terminate access after publishing
- Audit logs – record of all valid and invalid access

# Detailed usage analytics – users and content

# Mobile Security – with DRM

*Now available on  
mobile devices –  
iPhone/iPad &  
Android*

- With documents encrypted at document layer, exfiltration, accidents, and malicious insiders do not expose any sensitive information
- Documents can also be revoked, with no further access to decryption key
- Audit log of attempted access is also useful

**13 YOUR SPOUSE**

Mark one box to show your current marital status and provide information about your spouse(s) in items a. and/or b.

- |   |  |                                       |
|---|--|---------------------------------------|
| <input type="checkbox"/> 1 - Never married      | <input type="checkbox"/> 3 - Separated         | <input type="checkbox"/> 5 - Divorced |
| <input checked="" type="checkbox"/> 2 - Married | <input type="checkbox"/> 4 - Legally Separated | <input type="checkbox"/> 6 - Widowed  |

**a Current Spouse** Complete the following about your current spouse only.

Full Name Jane Doe	Date of Birth 07/04/1776	Place of Birth (include country if outside the U.S.) Philadelphia, PA	Social Security Number 123-45-6789
-----------------------	-----------------------------	--	---------------------------------------

Other Names Used (Specify maiden name, names by other marriages, etc., and show dates used for each name)	Country(ies) of Citizenship USA
---	------------------------------------

Date Married	Place Married (include country if outside the U.S.)	State
--------------	---	-------

If Separated, Date of Separation	If Legally Separated, Where is the Record Located? City (Country)	State
----------------------------------	---	-------

Address of Current Spouse, if different than your current address (Street, city, and country if outside the U.S.)	State	ZIP Code
---	-------	----------

**b Former Spouse(s)** Complete the following about your former spouse(s), use blank sheets if needed.

Full Name	Date of Birth	Place of Birth (include country if outside the U.S.)	State
-----------	---------------	--	-------

Country(ies) of Citizenship	Date Married	Place Married (include country if outside the U.S.)	State
-----------------------------	--------------	---	-------

Check one, Then Give Date	Month/Day/Year	If Divorced, Where is the Record Located? City (Country)	State
---------------------------	----------------	--	-------

<input type="checkbox"/> Divorced <input type="checkbox"/> Widowed			
--	--	--	--

Address of Former Spouse (Street, city, and country if outside the U.S.)	State	ZIP Code	Telephone Number ( )
--	-------	----------	-------------------------

**14 YOUR RELATIVES AND ASSOCIATES**

Give the full name, correct code, and other requested information for each of your relatives and associates, living or dead, specified below.

- |                     |                          |                   |                    |                                      |
|---------------------|--------------------------|-------------------|--------------------|--------------------------------------|
| 1 - Mother (first)  | 5 - Foster parent        | 9 - Sister        | 13 - Half-sister   | 17 - Other Relative*                 |
| 2 - Father (second) | 6 - Child (adopted also) | 10 - Stepbrother  | 14 - Father-in-law | 18 - Associate*                      |
| 3 - Stepmother      | 7 - Stepchild            | 11 - Stepsister   | 15 - Mother-in-law | 19 - Adult Currently Living With You |
| 4 - Stepsister      | 8 - Brother              | 12 - Half-brother | 16 - Guardian      |                                      |

\*Code 17 (Other Relative) - include only foreign national relatives not listed in 1 - 16 with whom you or your spouse are bound by affection, obligation, or close and continuing contact. Code 18 (Associate) - include only foreign national associates with whom you or your spouse are bound by affection, obligation, or close and continuing contact.

Full Name (if deceased, check box on the left before entering name)	Code	Date of Birth Month/Day/Year	Country of Birth	Country(ies) of Citizenship	Current Street Address and City (country) of Living Relatives	State
<input type="checkbox"/>	1					
<input type="checkbox"/>	2

# DRM Evaluation Guide

Recommended features to consider:

- ❑ Strong FIPS-140 encryption (AES 256)
- ❑ Cross-platform (Windows, Mac, iOS, Android)
- ❑ Multiformat (PDF, Office, CAD, custom)
- ❑ Ubiquitous viewer (e.g. Adobe Reader)
- ❑ Dynamic policy (change after publishing, including revocation)
- ❑ Detective controls (dynamic watermarking, detailed doc audit log)
- ❑ Continuous monitoring (advanced analytics)
- ❑ Automation ready (SharePoint, bulk automated encryption)
- ❑ Customization ready (client SDK, Server APIs)
- ❑ Strong authentication sources (multi-domain LDAP, AD, SSO, PKI)
